ABOUT THIS REPORT

This map reflects agencies with a tracked data exchange row in the program's integration status log. A county shaded dark blue is exchanging data from both a court and a jail/detention facility. A county shaded light blue has an active jail data exchange but no paired court feed recorded. Counties shaded light gray do not currently appear in the tracked exchange list.

No county in the current dataset has a court-only exchange without an accompanying jail feed — every court integration on record is paired with a jail integration for the same county.
